Colombia

Mainstreaming Climate and Biodiversity Across Finance

Results

Assessment of agricultural credit lines for nature-related risks and a greening of concessional finance by the national agricultural credit bank.

Additional safeguards already in place across 6 value chains with an additional 26 assessments.

The City of Bogota invested $1.5 million in a Payment for Ecosystem services.

Enhanced Policy Framework for Biodiversity Finance

Participating companies will strengthen their capacity to apply the Taskforce on Nature-related Financial Disclosures (TNFD) framework, improving how they assess nature-related risks and opportunities, disclose information, and integrate biodiversity into strategy—positioning them as early adopters driving more transparent and sustainable financial practices in Colombia.

Priority Investment Needs 2026-2030

Expanding Biodiversity and Climate Mainstreaming in Financial Institutions

FINANCE NEED
US$1.2m

EXPECTED RESULT
Policy Coherence

Climate+Nature

Enabling financial institutions to identify, assess, and manage their dependencies and impacts on nature. This improved decision-making capacity can influence financing and insurance practices that support conservation, restoration, and sustainable use of ecosystems.

Landscape Investment Facility

Build blended finance platforms for restoration landscapes.

FINANCE NEED
US$2.5m

EXPECTED FINANCE RESULT
US$20 million

Greening Incentives in Agriculture

Target 18

Expected to align at least USD 150 million in agricultural credit toward nature-positive practices.

FINANCE NEED
US$1.4m

EXPECTED FINANCE RESULT
US$150 million

Investment Needs

US$5.1
MILLION
to unlock $170 million by 2030
