Moldova

Scaling Biodiversity Finance Solutions

Results

Finance solutions identified so far focus on efforts to expand forest cover, strengthen ecosystem restoration, and integrate biodiversity across sectors.

Coordination between the Ministries of Finance and Environment has followed the work on the Biodiversity Finance Plan.

Emerging Biodiversity Finance Solutions

The intervention builds on national programmes and financing mechanisms, supported by the Ministries of Finance and Environment and aligned with fiscal reforms and green transition goals. It strengthens biodiversity finance through better policy integration, expenditure tracking, and blended finance for forestry, land restoration, and protected areas, contributing to global biodiversity and climate targets.

Priority Investment Needs 2026-2030

Local Finance Mechanisms

Develop local biodiversity funding tools.

FINANCE NEED

US$500,000

EXPECTED FINANCE RESULT

US$10 million

Capacity Building

Strengthen national institutions.

FINANCE NEED

US$500,000

EXPECTED RESULT

Policy Coherence

Agri-finance Reform

Align agricultural incentives with biodiversity.

FINANCE NEED

US$500,000
