Togo

Improved Integration and Visibility of Biodiversity

Emerging Opportunities

An initial assessment highlights that less than 20 percent of the resources required for its National Biodiversity Action Plan have been secured, leaving biodiversity action highly dependent on unpredictable external funding.

The opportunity now is to strengthen public finance systems, activate national funding mechanisms, improve revenue collection, and make biodiversity projects more bankable for national and international investors.

Innovative Financing and Stronger Policy Alignment

Despite many challenges, opportunities exist through innovative financing instruments, stronger policy alignment, and improving project bankability to unlock additional national and international funds.

Priority Investment Needs 2026-2030

Mainstream biodiversity into the green budget process

Integrate biodiversity priorities into national and local budgeting systems

FINANCE NEED

US$700,000

EXPECTED FINANCE RESULT

Policy Coherence

Operationalize the National Environment Fund

Activate the Fund as a central channel for national and international environmental finance

FINANCE NEED

US$700,000

EXPECTED FINANCE RESULT

Policy Coherence

Strengthen collection of biodiversity-related revenues

Increase domestic revenues from ecotourism, environmental taxes and biodiversity-related fees

FINANCE NEED

US$800,000

EXPECTED FINANCE RESULT

US$30 million

Investment Needs

US$2.2

MILLION

for transformative impact by 2030
